ALL-WEATHER PLYWOOD FOR OUTDOOR USE

Ultra-durable plywood for outdoor use, modified through an innovative treatment that provide the panel with exceptional durability, even after sanding or machining.

Immune to attacks from fungi and xylophages, even outdoors and without delamination, with a 15-year guarantee.

Duraply panels are made of premium single-piece core veneers from European sustainable poplar farms that provide extraordinarily lightweight panels making them easy to machine, virtually void-free with no telegraphing, exceptional bond quality, flatness, stability, and machining properties.

Faces with natural colorations, as well as those intrinsic to the exterior treatment and the frequent presence of knots. Both faces have been repaired. Ideal for covering or for raw use in applications that do not require a high aesthetic demand.

Applications:

Ideal for outdoor construction projects such as facades, roof supports, cornices, and doors. Perfect for outdoor elements, such as sheds, outdoor furniture, sign panels, do-it-yourself projects, and equipment for vessels.

Available with decorative finish* with exceptional beauty and resistance to impact and scratching.

* Laminate finishes are not suitable for exterior use.
