DECORATIVE HARDWOOD PLYWOOD WITH EUROPEAN POPLAR CORE

*Beauty that challenges
the ordinary*

Lightweight

Thanks to its poplar core from European plantations.

Beauty and surface quality

Wide variety of finishes in natural wood.

Dimensional stability

Excellent results in terms of modulus of elasticity and rupture.

Ease in machining

Very easy to cut and sand with all types of tools.

Sustainability

Plywood panels from certified fast-growing European plantations.

UV Finish

UV finish available on one or both faces.

NATUR BIND™

No-added formaldehyde technology

Naturbind™ by Garnica is a unique adhesive technology engineered using a no-added formaldehyde formula.

elegance

DECORATIVE HARDWOOD PLYWOOD WITH EUROPEAN POPLAR CORE

Wide range of decorative hardwood faces in natural wood from North America ideal for furniture and decoration. Hardwood veneer grades in accordance with American National Standards Institute (ANSI/HPVA HP-1-2009).

Elegance panels are made of premium single piece core veneers from European sustainable poplar plantations that provide extraordinary lightweight panels making them easy to machine, virtually void-free with no telegraphing, with exceptional bond quality, flatness, stability and machining properties.

Premium-quality poplar core from plantations

In addition to these exceptional attributes, these products are made with **Naturbind™**, a unique adhesive technology developed without added formaldehyde.

**NATUR
BIND™**

Glue Type: Interior

Technical features

	Values	Standard
Density (Lb/ft³)	27.47-30.59	EN 323
MOE - Modulus of elasticity (N/mm²)	3800-5000	EN 310
Face Screw Holding (kgf)	135	EN 320
Moisture content (%)	6-14	EN 322

Available with a UV finish on one or both faces, which highlights the beauty of the natural wood grain while increasing surface hardness.

UV

CARB Phase 2/TSCA Title VI - NAF and PEFC Controlled Sources
Certifications on demand: **PEFC Certified**
